Kevin Bragg, President  
Chrisanntha Construction Corporation  
PO Box # 165  
Gorham, NY 14461

July 25, 2009

To whom it may concern,

I have used Chrisanntha Construction Corp. for two different projects.

The first was a 70,000 square foot addition with 3 Demag Bridge Cranes which spanned 100 feet each. The building was very heavy electrified and had numerous overhead doors and window walls. I made several changes and additions through the course of the construction. When the project was complete, they had finished early, under budget, and with zero accidents.

The second project was an emergency roof collapse on a building, not built by Chrisanntha Construction Corp. When the emergency was discovered their supervisory staff arrived at the scene within an hour. They immediately took over vacating the area, securing access to the area, and installed devices to stop further damage. They brought in engineers immediately to evaluate the situation and began remediation. The work was completed ahead of schedule and way under budget. This was a potentially very dangerous project. The project was completed with zero accidents.

I attended the sites daily in both situations. Never did I see any staff members without their safety equipment on and being used properly. Their equipment was always neat clean and very well maintained. The products being used on the project were always neatly stacked out of the way in a very organized manner. Their staff were very friendly and appeared to be very well trained in multiple areas. Both projects involved sub-contractors that I hired and they interfaced seamlessly and without any incident. There were no incidents of poor workmanship and no incidents of poor material quality.

Doing business with Chrisanntha Construction Corp. has been a pleasure, they are real gentlemen, and I would absolutely use them on any future projects.

Sincerely,  
Rochester Insulated Glass, Inc.

Richard S. Wolk  
President
